

AASHISH THAPA MAGAR

Software Engineering · Backend & AI · Full-Stack

Irving, TX · 870-790-7590 · aashishthapa700@gmail.com · github.com/AashishThapaMagar · linkedin.com/in/aashish-thapa-magar-09689a341

SUMMARY

Computer science senior at UNT (GPA 3.66, graduating December 2026) who ships end to end: Python and FastAPI back ends, React and React Native front ends, and applied AI. Built the AI tagging pipeline on **MYRA** (UNT Senior Design Award), a live flash-flood early-warning system for Nepal and the U.S., and a seven-fighter 3D game in Godot. Two years of prior industry experience as a developer intern. Seeking software engineering, backend or AI internships and new-grad roles.

PROJECTS

Who Won? — 3D Fighting Game *Godot 4 · GDScript · Python · Blender* 2026 · github.com/AashishThapaMagar/Who-Won

- Built a seven-fighter 3D fighting game: Tekken-style four-button combo system, per-fighter move tables, frame-timed hit detection, AI opponents and a cinematic story mode.
- Wrote a Python/Blender pipeline that auto-rigs AI-generated characters onto a shared skeleton, cleans skin weights and exports T-poses for Mixamo animation packs.
- Profiled the renderer on integrated graphics and doubled the frame rate (about 25 to 50 FPS) by replacing MSAA with FXAA and simplifying scenery; 29 automated test suites cover combat, UI and story flow.

FlashFlood Watch — Early-Warning System *Python · FastAPI · SQLite · APScheduler · Leaflet* 2026 · flashflood-watch.onrender.com

- Built a real-time flash-flood alerting service that polls USGS and Nepal DHM stream gauges and raises WATCH, WARNING and EMERGENCY alerts from water level *and* rate of rise.
- Added CAP 1.2 alert export, a FastAPI + Leaflet dashboard and an authorized manual-alert endpoint; deployed on Render with tests running in GitHub Actions.

MYRA — AI Wardrobe Assistant *UNT Senior Design Award React Native · FastAPI · Node.js · MongoDB* 2026 · github.com/cherry0722/Style-with-Ai

- Won the UNT Senior Design Award as a four-person team (QuadNet) for an app that digitizes wardrobes and plans outfits from weather and calendar.
- Built the computer-vision and LLM clothing-tagging pipeline that auto-categorizes uploads; designed the wardrobe-upload flow and wired the FastAPI back end to React Native, storing results in MongoDB.

Soccer Video Understanding *Python · PyTorch · YOLO · OpenCV · Ollama* 2025 · github.com/AashishThapaMagar/video-understanding

- Fine-tuned a YOLO detector on 372 images (0.95 mAP@50 for players, 0.66 overall, about 20 ms per frame on a GTX 1650) and added a local Llama 3.2 layer that answers questions about a per-second match timeline.

Also built: **Mantix** — Next.js streetwear storefront with fal.ai virtual try-on, live on Vercel · **Echoes** — React/Express app that turns a described feeling into a cinematic video (Kling AI, Web Audio API) · **UNT Degree Audit** — student portal concept with an AI advisor.

EXPERIENCE

Software Developer Intern — Visa Success Connect Pvt. Ltd., Kathmandu, Nepal Jan 2021 – Jan 2023

- Built and maintained backend services in Python and Java that streamlined client data management.
- Shipped full-stack web features with a cross-functional team, lifting client engagement by 25%.
- Debugged and optimized legacy codebases, cutting system errors by 15%.

SKILLS

Languages	Python, Java, TypeScript / JavaScript, GDScript, C / C++, SQL
Backend	FastAPI, Django, Node.js / Express, REST APIs, MongoDB, SQLite
Frontend	React, Next.js, React Native, Vite
AI / ML	YOLO, OpenCV, PyTorch, LLM integration (Ollama, fal.ai, Kling), prompt engineering
Tools	Git / GitHub, GitHub Actions, Linux / WSL2, Vercel, Render, Godot, Blender, DaVinci Resolve

EDUCATION

B.S. Computer Science — University of North Texas	Dec 2026
GPA 3.66 / 4.0 · UNT Senior Design Award (2026)	
A.S. — Dallas College	May 2024

AWARDS

UNT Senior Design Award — MYRA (2026)
Golden Lion Intl. Film Festival — Best Micro Short Film, *The Wait* (2026)
CKF Intl. Film Festival · Lift-Off Filmmaker Sessions Vol. 11 — Official Selections
